Work Experience

Fast Enterprises, LLC, Springfield, IL - *Implementation Consultant (Apr 2025 - Present)*

- Build and customize driver and vehicle services software for state Departments of Transportation, including North Dakota DOT and the Illinois Secretary of State's new Driver Services project.
- Lead front-end and back-end development of NDDOT's driver pre-application, partnering with DOT directors and project managers from requirements through stakeholder demos.
- Modernized AAMVA API endpoints with REST and built .NET integrations with third-party vendors eDealer and VINtelligence.
- Implemented legislative changes for HB 1345, backfilling GVWR data on nearly 1 million titled trucks and updating registration weight and fee calculations for in-house and automated invoicing.
- Reduced database deadlocks through SQL optimization, set up Postman API testing for the team, and mentor new hires.

TPGM LLC, Remote - *Freelance Web Developer (May 2026 - Present)*

- Designed and built a full-stack real estate website and admin portal from the client's spec to MVP launch with React, Vite, Tailwind CSS, Supabase (PostgreSQL), and Vercel.
- Developed filterable housing search with shareable URL state, an advanced search with live match counts, listing pages with photo galleries and Google Maps, and an inquiry form.
- Secured the staff admin portal with Supabase Auth and PostgreSQL row-level security; shipped with feature flags, and staging/production deploys.
- Used Claude (AI) to turn the spec into detailed project plans, audit code and security, and check best practices, while directing decisions and reviewing all output.

Adventures with Mr. Math, Remote - *Senior Software Developer (Jan 2023 - Mar 2026)*

- Built a React and Tailwind CSS e-learning portal for 3,000+ students, parents, TAs, and teachers, including authentication, class scheduling, interactive worksheets, timed contests, and messaging.
- Integrated with an ASP.NET Core REST API, wrote SQL for testing in SSMS and Azure Data Studio, and deployed Docker images to AWS for staging and production.
- Engineered a client-side caching system for call-heavy worksheets, smoothing multi-problem work and reducing server load.
- Created and led the QA process with the Lead QA Engineer, and reviewed security vectors with a senior full-stack developer.
- Promoted to Senior Software Developer (May 2025): interviewed and onboarded front-end developers, ran code reviews, and approved pull requests.

Adventures with Mr. Math, Remote - *Director of Teaching Assistants (Jul 2022 - Feb 2025)*

- Managed, scheduled, and interviewed 60+ teaching assistants, including staffing for national student competitions.
- Wrote a C# tool using the Google Sheets API to automate monthly TA hours, saving 4-6 hours a month and $7,000-$11,000 a year while reducing payment errors.

Projects

My Portfolio, https://www.danezdalton.com/ : A personal portfolio showcasing my UI/UX work and projects; building it sharpened how quickly I solve UI/UX problems at work.

Education

Iowa State University, Ames, IA | 2021 | Bachelor of Science, Environmental Science | Minor in Biology

Skills

Languages & Frameworks: JavaScript, TypeScript, React, Tailwind CSS, Vite, C#, .NET / ASP.NET Core, SQL, PostgreSQL, Supabase, HTML, CSS, Ruby on Rails, C, C++

Tools & Practices: Git, Docker, AWS, Azure, Vercel, REST APIs, Postman, SSMS, Azure Data Studio, Linux, AI-assisted development (Claude), UI/UX, Web Accessibility (WCAG), Salesforce Certified Administrator
